

ACS Division of Polymer Chemistry Symposium

ENERGY & MATERIALS II

*Materials for Efficient Energy Generation, Transmission, Utilization, and Storage
Devices Sustainable Energy Materials for Carbon Sequestering*

249th ACS National Meeting & Exposition
March 22-26, 2015, Denver, CO

Graphical abstract submissions opens fall 2014
Oral and poster sessions available

Invitation. Energy is the single most valuable resource for human activity and the basis for all human progress. The *Energy and Materials* symposium focuses on innovative ways to provide energy and material resources to society in a sustainable and environmentally responsible manner. Materials play a key role in enabling technologies that can offer promising solutions to achieve renewable and sustainable energy pathways for the future. Scientists, engineers, and technologists interested in the latest developments and advances in this diverse field are invited to contribute oral and poster presentations are highly encouraged. This symposium offers authors an invitation to submit for publication to a follow-on companion, peer-reviewed *ACS Symposium Series: Advances in Energy & Materials*. This will be the second biannual ENERGY & MATERIALS symposia hosted by the ACS Division of Polymer Chemistry (POLY) and co-sponsored with ACS Division of Polymeric Materials: Science and Engineering (PMSE) and ACS Division of Energy and Fuels (ENFL).

Topics include, but are not limited to the new advances of materials/material components for:

- *Fuel cells*
- *Photovoltaics and solar cells*
- *Batteries*
- *Supercapacitors*
- *Carbon sequestration*
- *Modeling and theoretical aspects*
- *Characterization techniques and monitoring*

Symposium Organizers and Co-Chairs

Professor Stephen J. Clarson, University of Cincinnati, stephen.clarson@uc.edu

Professor Scott T. Iacono, United States Air Force Academy, scott.iacono@usafa.edu

Professor Dennis W. Smith, Jr. The University of Texas at Dallas, dwsmith@utdallas.edu

Professor Alan Sellinger, Colorado School of Mines, aselli@mines.edu
